We started working together as DLITEproject three years ago, after many years attempting the same schools together.

Our design wants to communicate base concepts in everyday living: **flexibility, innovation and heritage respect** are the base concepts which we refer to design everything.

Starting from small objects to urban ambient's structures our common thought is design everything with an industrial approach, to let the product be as simple as possible to be produced.

### **Eventi a cui abbiamo partecipato:**
